

Talking to your doctor about fibroids and polyps

If your doctor tells you that you have fibroids or polyps, here are some questions you may want to ask:

- How many fibroids or polyps do I have?
- What size are my fibroid(s) or polyp(s)?
- Where are my fibroid(s) or polyp(s) located?
- How rapidly have the fibroid(s) or polyp(s) grown (if you already knew about the fibroid(s))?
- How will I know if the fibroid(s) or polyp(s) are growing larger?
- What problems can the fibroid(s) or polyp(s) cause?
- What tests or imaging studies are best for keeping track of the growth of my fibroid(s) or polyp(s)?
- What are my treatment options if my fibroid(s) or polyp(s) becomes a problem?

Notes and other questions

Important Safety Information: The MyoSure hysteroscopic tissue removal system is intended for hysteroscopic intrauterine procedures by trained gynecologists to resect and remove tissue including submucous myomas, endometrial polyps and retained products of conception. It is not appropriate for patients who are or may be pregnant, or are exhibiting pelvic infection, cervical malignancies or previously diagnosed endometrial cancer.
